Juan Escudero

Senior Unity Developer — Gameplay, XR & Backend Integration

Sjögaråsvägen 16, 504 93 Borås, Sweden • +46 76-318 84 88 • juanesteban.dev@gmail.com
linkedin.com/in/juanestebandev • juanesdavinci.github.io

Senior Unity Developer with 10+ years of experience building mobile, VR/AR and live-service products. Strong in Unity/C# gameplay systems, backend and service integration, editor tooling and scalable architecture. Led teams, shipped titles to the App Store and Google Play, and supported platforms serving 100,000+ users. Based in Borås, Sweden; fluent in English, native Spanish.

CORE SKILLS

Engine & Development: Unity3D, C#, Coroutines, Object Pooling, URP, Shader Graph, Addressables, Android native plugins

Gameplay & Systems: Game Mechanics, Game Design & Balancing, Animation Systems, UI/UX Integration, Multiplayer Systems

XR Platforms: Meta Quest / Oculus, AR Foundation, Vuforia, MaxST, HoloLens, Meta 2

Backend & Integration: PlayFab, Azure, Firebase, REST APIs, SQL Server (schema design), Python (dashboards & admin tools), Serverless JS

Platforms & Delivery: iOS, Android, PC, macOS, WebGL, App Store / Google Play publishing, CI/CD

Tools & Process: Editor Tooling, Git, Agile/Scrum, Code Review, Technical Documentation

Certification: Unity Certified Associate — Industry Developer

EXPERIENCE

Abacus Brands, Vancouver, Canada — *Sr. Unity Developer & Team Lead*
April 2024 – September 2026

- Led the app development team: system design, code quality and performance standards
- Pitched, designed and delivered a content hub app that replaced a separate app per product, from stakeholder presentation to production
- Modernized the legacy codebase to current standards for Odyssey XR, supporting 100,000+ users
- Built a ticket-based support system and an admin backend so editors, testers and support could manage content without technical knowledge
- Implemented AR with MaxST, then migrated to AR Foundation when the licence expired
- Built a Unity + Android native plugin that downscales content for low-end phones, fixing playback for affected users
- Improved visuals across several apps using URP and custom editor tools

MindTrust, USA (remote) — *Sr. Unity Developer*
Apr 2019 – Oct 2020, Feb 2022 – Mar 2024

- Built game mechanics, animation, UI integration, multiplayer and multilingual systems
- Designed SQL schemas and data layers for Backdrop Alive (live on stores), Alyfyan and Globe Alive
- Built Python dashboards and admin tools for Firebase backends; helped build websites with WordPress/PHP and serverless JS

Little Orbit, USA (remote) — *Sr. Unity Developer*
September 2021 – February 2022

- Developed editor extensions that sped up the comic and tutorial content pipeline for an undisclosed DC project (NDA)

Endless Adventures, Canada (remote) — *Sr. Unity Developer*
October 2020 – September 2021

- Designed a no-code logic system that let writers create game content without programming
- Shipped Sea of Legends: core mechanics, UI optimization and store publishing
- Maintained the PlayFab/Azure backend; led client-facing meetings and code reviews

Quatio, Medellín, Colombia — *Unity Developer — Team Leader*
May 2015 – April 2019

- Led a development team using agile methods; owned game mechanics, deployment and support across several apps
- Delivered Unity C#, Java Android, iOS Swift and .NET applications, plus AR/VR on Oculus and Meta 2

ACHIEVEMENTS

- **Lead game design and balancing on Cubeats, a VR musical puzzle/adventure game for Meta Quest**
- **Shipped Sea of Legends — core mechanics, UI optimization, store publishing**
- **Led Cold Case VR end-to-end, from scratch to release (AR/VR)**
- **Modernized legacy code for Odyssey XR, supporting 100,000+ active users**
- **Shipped multiple apps to the Colombian market through rapid prototyping**

EDUCATION

Instituto Tecnológico Metropolitano, Medellín, Colombia — *Software Development*
2016 – 2019

SENA, Medellín, Colombia — *Game Developer Technician*
2013 – 2015

LANGUAGES

Spanish: Native • English: Fluent (CELPIP 10)
