

Juan Escudero

Sr. Unity Developer — Gameplay & Interactive Systems

Vancouver, BC • (1) 672 855 0924 • juanesteban.dev@gmail.com • [linkedin.com/in/juanestebandev](https://www.linkedin.com/in/juanestebandev) • juanescudero.github.io

Senior Unity Developer with 10+ years building gameplay systems, VR/AR experiences, editor tooling, and backend integrations. Strong focus on scalable architecture, mobile publishing, and shipping polished products across iOS, Android, PC, and XR platforms.

CORE SKILLS

Engine & Development: Unity3D, C#, Coroutines, Object Pooling, URP (Universal Render Pipeline), Shader Graph
Gameplay & Systems: Game Mechanics, Physics, Animation Systems, UI/UX Integration, Event-Driven Architecture
Backend & Integration: PlayFab, Azure, Firebase, REST APIs, SQL Server, Serverless JS
Platforms: iOS, Android, PC, VR (Oculus/Meta Quest), AR (AR Foundation, Vuforia, HoloLens, Meta 2)
Tools & Pipeline: Editor Tooling, Editor Extensions, Git, Agile/Scrum, CI/CD, Addressables
Multiplayer: Multiplayer Systems, Real-Time Networking, Backend Integration
Certification: Unity Certified Associate — Industry Developer

EXPERIENCE

Abacus Brands, Vancouver, Canada (on-site) — Sr. Unity Developer

April 2024 – September 2026

- Led app dev team designing systems, enforcing code quality and high performance standards
- Architected and shipped VR and AR experiences focused on accessible, polished playability
- Modernized legacy codebase for Odyssey XR, supporting 100,000+ active players
- Improved visual fidelity across multiple apps using URP and custom Editor Tools

MindTrust, USA (remote) — Sr. Unity Developer

Apr 2019 – Oct 2020, Feb 2022 – Mar 2024

- Built gameplay mechanics, animation systems, UI integration, and multilingual systems across multiple titles
- Developed multiplayer systems and real-time backend integrations for live-service products
- Designed SQL schemas and implemented data layers for Backdrop Alive (live) and Alyfyan

Little Orbit, USA (remote) — Sr. Unity Developer

September 2021 – February 2022

- Engineered custom editor extensions for an undisclosed DC project under NDA
- Improved content authoring speed and reliability for non-technical team members

Endless Adventures, Canada (remote) — Sr. Unity Developer

October 2020 – September 2021

- Designed and built a no-code logic system enabling writers to create game content without programming
- Shipped Sea of Legends — core mechanics, UI optimization, and store publishing (iOS/Android/PC)
- Maintained live PlayFab/Azure backend and led client-facing technical meetings

Quatio, Medellín, Colombia — Unity Developer — Team Leader

May 2015 – April 2019

- Led a team of five delivering Unity C# applications across mobile (iOS/Android) and AR/VR (Oculus, Meta 2)
- Shipped multiple products to the Colombian market with fast prototyping and Agile methodology

ACHIEVEMENTS

- Shipped Sea of Legends — core mechanics, UI optimization, store publishing

- Led Cold Case VR end-to-end, from scratch to release (AR/VR)
- Modernized legacy codebase to current standards for Odyssey XR, supporting 100,000+ active players
- Shipped multiple apps to the Colombian market via rapid prototyping

EDUCATION

Instituto Tecnológico Metropolitano, Medellín, Colombia — *Software Development*
2016 – 2019

SENA, Medellín, Colombia — *Game Developer Technician*
2013 – 2015
